

6516208714.txt

I am a truck driver that not only uses but depends on the XM Instant Traffic & weather to do my job. It is a tool I use daily for my own safety and everyone on the road around me. Local channels do not provide this information as quickly and often as I can get it from XM. As a paying subscriber, I am entitled to listen to this channel. If you are driving next to me, a fully loaded semi carrying lumber, you better hope I know that the highway has come to a dead stop 1 mile ahead or that the roads have suddenly become icy. This is no joke! Traveling from state to state I cannot try to find the local station in every town I go through. Just remember, you or your family may be on the road next to me.
